

SEAL Performance Guarantee

SEAL Digital Adhesive Vinyls & SEAL Overlaminates

SEAL brand is now offering a quick way to take the guess work out of producing high quality long-lasting digital signage. When printing on the new SEAL digital adhesive vinyls and then applying one of the high quality SEAL laminates, we guarantee that our products will perform to the durability for the term outlined below, or we'll replace or credit the SEAL materials used.

As part of the Neschen Americas 100% Customer Satisfaction Guarantee, SEAL digital adhesive vinyl products combined with SEAL overlaminates provide excellent performance, GUARANTEED!

Print Media	Overlamine	Indoor Durability	Outdoor Durability	Vinyl Grade

Coverage

The above products are warranted to be free of defects including:

- Visual and aesthetic defects in film, adhesive, or coating.
- Mechanical defects affecting usability in application.
- Variations in color or texture.

Application Guarantee Conditions

SEAL warrants the use and application of its products to perform to written characteristics as outlined in the matrix above. Please refer to the Seal Product Tech Data Sheet or the SEAL Technical Service department for appropriate process conditions for use and construction of your application. When properly applied and installed the following products finished graphics are warranted to:

- Remain free of aesthetic and appearance defects including cracking, discoloration of face films, peeling, changes in gloss or texture, blistering, de-lamination or other degradation related to product performance that would make the application unsuitable for its intended purpose.

*For details on the guarantee limitations and warranty claims, please visit www.sealbrands.com.

*SEAL is not liable for costs associated with printing, inks, substrates, converting, or any other cost, loss, or liability in any way related to the performance, use, or inability to use the product. This warranty remedy is limited to the distributor for products and/or the end user or fabricator for applications.

*In high UV index regions, such as, but not limited to, South Florida, Arizona and Colorado, outdoor durabilities are 50% of stated above.
